

## Ocula - Stereoscopic Imagery Plug-ins for Nuke.

### PRODUCE HIGH-QUALITY STEREO VFX FASTER

Ocula® is a unique and powerful collection of 16 workflow plug-in tools for Nuke that help take the headache out of stereo post-production.

#### Fix common stereoscopic problems

Ocula's fine-level control makes producing high-quality stereo VFX faster and easier, with the ability to correct color and focus, automatically correct alignment, retime stereo views and more.

#### Create sharp and accurate images

Image-building tools match original footage without depth tearing, while additional tools enable you to calculate clean and stable stereo disparity without depth roll-off.

#### Turn around shots in less time

Built-in automation allows corrections to be scripted for offline work, while advanced GPU acceleration speeds up interactive processing, with the same results as the CPU.

### WHO'S USING OCULA?

← Previous

Next →

FILM

**Henning Glabart** – 2D Supervisor/Deputy Head of 2D, Milk

"When it comes to stereo, Ocula is the go-to software. It's super efficient and gets better with every new version. Plus the licensing model is really flexible."

Next →

FILM

**Alicia Aguilera** – Lead Compositor, Double Negative

"Foundry's commitment to development and support of their software, and to the vfx industry, is evident. As a compositor, I do not see another package on the horizon that offers or will offer the depth of capabilities in Nuke."
