Enhanced productivity with Adobe Acrobat Premium for enterprise
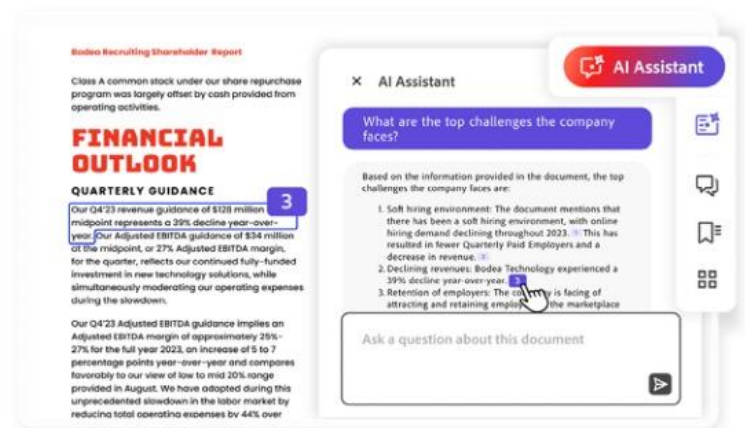

The rapid adoption of generative artificial intelligence (AI) has forced organizations to find new ways of improving efficiencies and empowering their workforce to be more productive. On average, knowledge workers spend over eight hours per week searching for, recreating, and resharing information*—highlighting the need to improve time to information and boost document productivity. While generative AI can unlock human potential, implementing AI has proven to be a challenge as tools often come with security risks, high costs, and deployment complexities.

Adobe Acrobat Premium for enterprise provides a best-in-class document productivity tool that is designed to be safe and secure. With the integration of AI-driven functionalities, Acrobat Premium for enterprise helps streamline document workflows, enabling knowledge workers to accelerate their tasks and focus on what truly matters.

Turn your documents into action with AI Assistant.

Acrobat Premium for enterprise includes AI Assistant, a conversational feature that accelerates time to knowledge with summaries and Q&As to get answers quickly. AI Assistant allows users to stay in control of their documents, and customer data is not used to train large language models (LLMS). Adobe's unique proprietary extract technology generates insights across one or many documents, with attributions back to the source to help ensure users are accessing credible information.

Acrobat Premium for enterprise is easy to use, includes responsible data security practices, and takes just minutes to deploy.

Robust security helps ensure your data remains your data.

AI Assistant looks only at the documents you tell it to and does not crawl your files.

High-quality attributions, seamless multi-doc.

Deep knowledge of PDFs and Adobe proprietary extract technology.

Designed for document tasks.

Supports long complex documents (up to 600 pages), contracts, and scanned documents.

Legal & compliance
Accelerate review of new partner proposals and documents for risk analysis and due diligence.

Marketing & communications
Generate compelling and dynamic sales enablement material from product pages and FAQs.

Research & development
Analyze product reviews, support tickers, and social media to inform product improvements.

Finance & Investor relations
Summarize and draw insights from multiple financial statements and industry reports.

Sales
Quickly and efficiently prospect new customers, create sales proposals, and respond to customer requests.

Human resources
Update policy documents faster with instant insights and summaries.

Organization-wide **protection for documents and data.**

Adobe is committed to protecting our customers most important digital documents. We understand the security required to protect users and meet business needs. Acrobat offers a comprehensive, multilayer approach to data protection, giving enterprises controls to dial up security as needed to meet their specific business needs. All AI Assistant features in Acrobat go through Adobe's responsible AI Ethics governance process and are developed and deployed in alignment with our AI Ethics principles.

Adobe security
- Secure-by-design and secure-by-default development practices
- Testing from an adversary-aware perspective
- Proactive monitoring and swift remediation
- Strategic governance, risk management, and security compliance initiatives

Document security
- Protected view and protected mode with sandboxing
- Secure file share and review
- Dedicated key encryption
- Microsoft Purview Information Protection
- AI Assistant only looks at the document(s) that you tell it to
- Customer data is not used for LLM training

Designed for enterprise
- Centralized management and access control from Adobe Admin Console
- Enterprise controls for AI Assistant
- Enterprise compliance certifications
- Integration with Microsoft 365, SharePoint, and OneDrive
- Ability to use AI Assistant without Adobe cloud storage

Work with stakeholders **efficiently from anywhere.**

- **Desktop, mobile, and web:** Collaborate on PDF content from your computer, mobile device, or web browser and while on the go. Enable real-time reviewing and commenting on documents directly in Microsoft Teams with multiple stakeholders.
- **Safe and secure collaboration:** Share PDF links to gather and manage feedback from one place—instead of multiple email attachments—and within your familiar Microsoft 365 apps, making collaborating easier while also remaining safe and secure.
- **Integration into existing tools and workflows:** Create and collaborate on PDFs from Microsoft 365 apps and provide storage for Acrobat PDF documents on your company SharePoint or OneDrive cloud storage, so documents live on the surfaces that employees are familiar with.

The experts in digital documents experiences.

TIME Best Inventions of 2024

Adobe Acrobat AI Assistant was named by TIME as one of the best inventions of 2024 for smarter PDFs.

Inventor of PDF

30+ years of innovating on the PDF file format and setting the gold standard in the industry.

Fast time to value

Users find AI Assistant within Acrobat—where they are used to consuming and editing PDFs.

> "It is not about the technology; it is about the adoption. It is easy and convenient for our users while providing the stringent protections demanded by customers and financial industry regulations."

David Poirer, VP Operations and IT Sturbridge Capital
